A new dermatological practice providing state-of-the-art medical and cosmetic skin care “across lifetimes” opened its doors in Monterey on June 6th.

Founded by Dr. Christina Bolante on the principles of healthy skin, Parasol Dermatology works out of its second-floor suite at 900 Cass St. Suite 200 (Second Floor), in Monterey.

Named Parasol due to its comprehensive, A-to-Z skin care under one “umbrella,” the practice aims to help patients of all ages achieve healthy, beautiful skin through the latest and most advanced treatments available.

“Our skin is an evolving organ, changing so much over time, and our practice was designed to be there for patients across their lifetimes,” said Dr. Bolante, an active member of the American Acad-

emy of Dermatology and the American Society for Dermatologic Surgery. “From kids with warts or acne, adults with eczema or skin cancers, and grandparents with thinning skin and wounds to those who seek cosmetic improvements, Parasol offers a wide range of services for all ages.”

Parasol Dermatology was founded on the principles of healthy skin—our body’s miraculous covering that comes into contact with the rest of the world.

As the largest organ of the body, the skin covers a total area of about 20 square feet. No other organ demands so much attention and concern in both states of disease and health. There are more than 3,000 possible skin disorders, and Parasol Dermatology will use the latest advances in technology to help identify and treat them all.

As a full-service, state-of-the-art dermatology practice, we also offer the latest advances in anti-aging and skin rejuvenation procedures, injections and other cosmetic treatments.

Because skin is an evolving organ, changing so much over time, Parasol Dermatology seeks to be there for patients across their lifetimes.

From Latin, the word “parasol” (“para” for “shield” and “sol” for “sun”) tells part of our story. However, a parasol also is a canopy, and patients will discover that we are a comprehensive practice—offering everything under one umbrella.

From kids with warts or acne, adults with eczema or skin cancers, and grandparents with thinning skin and wounds to those who seek cosmetic improvements, Parasol Dermatology is here to help everyone love the skin they’re in.

Dr. Bolante graduated from the University of Washington School of Medicine in 2006, and completed her residency in dermatology at the University of Pittsburgh.

Now in private practice following years spent in medical groups, Dr. Bolante is an enthusiastic, driven dermatologist with a commitment to providing the highest quality of patient care with exceptional customer service.

Parasol will hold its grand opening ribbon-cutting ceremony on Tuesday, June 28, where the public will meet the medical team, enjoy bubbles and small bites and take home product giveaways.

The festivities will include a special ribbon cutting with the Monterey Peninsula Chamber of Commerce and Carmel Chamber of Commerce. ■
